

## Meeting Summary

Meeting Link: <https://meet.google.com/fkz-qwfm-ehp>

### Transcript:

to learn and think. Anything can be considered as a database. If we did also program doing something that we would normally rely on our intelligence. And here to talk about the advantages of our initial advantages, one of the previous advantages is that it reduces human error. Human error is one of human's main states, states like usually and it happens all the time. So computers however do not make all these in states with artificial intelligence that the actions are taken but the previous look

### Bullet Points:

- Anything can be considered as a database
- If we did also program doing something that we would normally rely on our intelligence
- to learn and think.
