Transcript:

I'm Tegan and our act acts as a personal tutor. Our website measures poverty for UNICEF. My name is Joanne and this app lets us use some messages and augmented reality. We do a lot of app for NHS that tracks skin cancer. The software engineering project unit is an opportunity for students to take their individual programming experience and use it as part of a large-scale, climate-led project. This unit really sets Bristol apart. It's something that not a lot of other universities offer and so it gives you those skills of going into a workplace. I think software engineering project is really important here for you. It teaches you how to work professionally and how to also interact with the clients in the outside world. I believe that this unit is really beneficial as a teacher's duty, many employability skills stuck in the applicable to the real world. This project gives you something to put on your portfolio. It means you have an app, you've developed something. The main thing that we're most pleased about is the fact that our work is definitely going to be used in the future as well as we can kind of see the way in which our results are being used currently. This is how it's going to be when you go and focus on industry, right? It's a really important experience as a secondary student to learn how to work with clients, how to...

Bullet Points:

- The software engineering project unit is an opportunity for students to take their individual programming experience and use it as part of a large-scale, climate-led project.
- "What I'm most pleased about is the fact that our work is definitely going to be used in the future," she says
- "It's a really important experience as a secondary student to learn how to work with clients"
